

# CSCM64 Third Coursework

To be solved in groups of at most three.

Submission deadline: 8<sup>th</sup> April 2022, 23:59 BST.

Submissions must be made through Canvas in PDF format.

Clearly state the names and student numbers of all group members at the beginning of the document.

Please only make one submission per group.

Write an informed essay about *one* of the following topics:

1. Testing in the Agile environment.
2. Testing internet applications.
3. Testing mobile applications.

You can start your studies on these topics with the book

Glenford J. Myers, Tom Badgett, and Corey Sandler. *The Art of Software Testing*. Wiley, Hoboken, 3rd edition, 2011. ISBN 9781118031964

An online copy is available from the Swansea University library. However, you will need to consider further literature if you want to achieve a high mark.

It is a requirement to observe the following page and word limits:

1. The length of your essay must not exceed three pages.
2. The word count must not exceed 1500 words.
3. A bibliography should be included. The contents of the bibliography do not count towards page length or word count of your essay.

Any contents of your submission (other than the bibliography) exceeding the page limit or the word limit will be treated as non-existent.

Your essay will be marked according to the following criteria:

- Contents: 60%
- Bibliography: 15%
- Presentation: 25%

The marking criteria are further elaborated in the marking scheme for the Initial Project Report for the module CSCM10/CSCM10J. The “Contents”-criterion will be marked like the “Literature Review”-criterion for the Initial Project Report.
